

Maria Gianni

giannima@uom.edu.gr

Maria Gianni right after her graduation she entered the textile industry and dealt with purchasing and quality control. Then, she worked at several innovation EU projects. As a freelancer she specializes in water quality monitoring, wastewater treatment and waste management, in general. Following her post graduate studies she has taught courses in quality management. She has been a PhD researcher and teaching assistant at the University of Macedonia. Her research interests include integrated management systems, corporate sustainability and management system standards. She has participated in a number of conferences and co-authored several research papers.
